WHAT THE GENERAL SAID!

WHAT THE CENERAL SAID!

A noted General being asked by some of his friends how he liked Texas, replied "If I was obliged to choose between Hell and Texas, I would choose the former." The above saying is verified every day by parties moving from the North, East and South, and as they cannot decide exactly as to the existence of the former, they certainly avoid Texas, and like sensible, industrious people, seek a productive country, such as Missouri, Kausus, Colorate of Nebraska and the Far West. Reader, are you contemplating a trip to such a country on business or pleasure? Once his isugh with merry ring
pailed our house with music rare,
And his loving hands would bring
Wreaths of blossoms for my, hair;
One merry, happy sprite,
Constant, consoless source of joy?
But to night, O God, to-night,
Where, uh! where s my wandering boy?

Midst the glitter and the glare
Of the room where death is deatt.
Scare you'd know him: but he's there,
He who once ar reverent knets
At my knoe, and safely apoke
Words into the earl of Ood;
O my heart! 'dis anition, broke;
Crushed, I bond benoath the red.

O this curse that spoiled my buy, Lod him down and down to death, Robbed me of my rarcet joy, Made a pany of every broath! Mothers, fathers, hour my plen! Let your pleadings pierce the sky; Pay and work most carnestly; Let us save our boys, or die!

WHAT THE GENERAL SAID!

A noted General being asked by some of his friends how he liked Texas, replied and Texas, it would choose the former. The above saying is verified every day by parties moving from the North, East and South, and as they cannot decide exactly as to the existence of the former, they certainly avoid Texas, and like sensible, industrious people, seek a productive country, such as Missouri, Kausus, Colorator, on business or pleasure? THE MAINE ELECTION.

For the first time in twenty years the state of Maine has failed to elect a Republican governor and state officers, although the candidates of the party have received a handsome plurality over those of the other two parties. This result, though not generally looked for, was not considered impossible by the best political judges, and should therefore not surprise anybody very much. The truth is, that the times are propitions for the success of any movement which affords opportunities for the display of the arts of the demagogue. The paralysed condition of many of the industries of the country, the lack of employment consequent thereto and the presence of want and suffering in wide regions-all these make easy the task of the demagogue who has a sovereign panacea for all the ills of the people -When a man is in debt beyond his abil ity to pay, or when he has no employment and nothing for his family to live upon, he is an easy victim for the ad vances of the blatherskite who comes to him with specious promises of "more money," because he argues that nothing could be worse than his present condition, and that any change would be for the better. Men in this condition are not very apt to be affected by any appeal to their sentiments of national honor, nor even by references to historifutility of the flat money idea. They are really prone to catch at any scheme, however wild, which holds out to them

the alluring promise of better times. We do not have any apprehensions that the flat money craze will ever carrect to "Joe Cannon, Danville, Illinois." ry the country. It will have its day, singe-horse sense that he would not take like many another wild scheme, but its death will be speedy and inglorious. It is not likely that it will survive long enough to be a factor in the elections of 1880, but while it struts its brief career it may carry a congressional distriot here and there, as it has in Maino, and then follow in the wake of granger- galaxy of stars that no generation has tant problem of the day. What are the ism and its other almost forgotten pre-

In 284 cities and towns Gov. Connor this year received 47,278 votes; the same towns last year gave him 44,998. The Democratic candidate in these towns last year received 32,673 votes, and this year 22,754. These figures show that the Republican vote has increased 2,280, while the Democratic vote falls short of last year's vote 9.910. In these towns Connor (Rep.) has a majority over Garcelon (Dem.) of 24.524. and 14,442 majority over Smith (Greenbacker). From these figures it will be seen that the greenback vote in Maine is very largely made up from the Demnoratic party, and clearly indicates that if the Republican party had only the Democratic or Greenback party to defeat it would be an easy task, but where the state laws are such that the winning party must have a majority over all opposing factions, the Republican party finds it more difficult to overcome all the heresies that seem to have taken possession of the people. The Democratic party, without any fixed policy of its own except opposition to every Republican measure, stands ready to coalesce with any form of opposition, even to the extent of supporting Ben. Hatler for governor of Massachusetts.

ABOLISH ALL SCRUB TYPLES.

The Globe-Democrat suggests that military "serub titles" be dispensed with. The writer heartily approves.— Having been dubbed "colonel" for many years by reason of a commission from the Governor of my native state, and having gone into camp with my regiment preparatory to going to Mexico, when Gen. Taylor's little band were surwhen Gen. Taylor's little band were sur-consideration in many places. Upon rounded. The volunteers were so num-this subject the Philadelphia North erous that very many regiments, with my own, were notified that they were not wanted. ('onsequently, I do not feel that I carned the title. I have never smelled powder, I never fought, bled and died for my country-therefore I am unworthy of the title, and feel it sensibly when in the presence of Gov. Oglesby, Captain Post, Corporal W. J. Herey, Judge Gallagher, Dr. Stapp, and other veterans of the Mexican war; also, when in company of our brave boys who saved the Union in our recent drilled them, and marched them to the nearest rendezvous. Only doing this, I aspire to no distinction. I should only be known as a citizen in war, a soldier in peace, although I have been in many hard fought engagements while doing camp duly, and upon every occasion was at my post in the front rank, shoulder to shoulder with my brave comrades, and with courage unequaled in history gave the order, "Onward, my boys' charge, my gallant lads! dare to follow where I lead!" when a wagon loaded with watermelons was driven inside of our picket lines. We knew no such word as fail. The entire line advanced with the tread of veterans, our swords were unsheathed, and with cool heads and unruffled blood we split them in twain and drank from the pulp-cleaned rind the water, as did the Romans the blood from their unemies' skulls.

In my judgment there are too many watermelon generals, colonels, majors, &c., in our midst. Let the military titles signify who did patriotic service to their country, and not to men of my ation to spill the first or the last drop of blood in defence of the old flag. We also have in this democratic country too many titles in the civil department, where one man is as good as another although poor as a church mouse, prorided he has implanted in his nature to 'do unto others," &c , and the manhood to bear up under adversity when "disaster upon disaster comes following fast, following faster." This glorious repub lie knows no royalty. We want no lords; every man is a sovereign. Our imitations of the countries across the pend is a species of flunkeyism that ought not be tolerated. It is superfluous balderdash to talk of His Excellency the Governor. We have too many Esquires, too many men with the title of Honorable tacked to their names, it is the custom to prefix "honorable" to our public servants from county supervisors through all the official cutalogue. There are no rulers but the people in this cal parallels going to show the utter country; the people are behind the futility of the flat money idea. They Government, and have the inalienable right to dispense with fictitious titles and address their public servants in a plain, gentlemanly, sensible manner. Tuz recent orders of the Treasury Dopartment with reference to the distribution of standard silver dollars will add materially to the business of the express companies, and the transportation of the coin to the various Sub-Treasuries will cost the Government quite a large sum. The weight of one million eilver dollars is over twenty six tone, and the payment in silver of one day's customs duties would average about 60,000 pounds, or fifteen tone of standard silver dollars, should the coin be placed in actual use for the payment of these duties.

THE report that Senator and Mrs. Bruce intend to keep house in Washington the coming winter, makes a good deal of stir there. THE REPEAL OF THE RESUMPTION LAW.

The Effect Upon the National Banks— What the Result Would He to the Poople. The efforts of the Greenback parties to secure the repeal of the Resumption act, and the effect upon the country, if such a course should be pursued by the next Congress, is receiving serious

American says: There is a general expectation that an effort will be made for the repeal of the National Bank act, and if the Greenbackers and Democrats carry the politi cal canvass this Fall, its chances for success will be decidedly good. The provisions of the act at present are worth little or nothing to the banks and many of them are detrimental, as they impose burdensome taxes and ethor restrictions that the State banks are free from. The repeal will not in any struggle-as I only raised companies, way injure the national corporations, except it will be likely to throw a large volume of bonds on the market that are now on deposit with the Government to secure circulation. Such an increased offering of the securities, and the pressure to sell, would naturally cause a heavy decline in their market value, and might, for the time being, greatly disarrange the finances and general business of the country.

If, however, the proposed programme of substituting legal tenders for national bank currency should be carried out, the scarcity of currency would only be temporary; but the loss to the national banks by the deprociation in the price of their securities would be severe, and some of them are said to be already preparing for such an emergency by lisposing of their bands so far as they triet. The weather to night is identiare able to do so, and it is hinted that in some instances the necessary meas ures have already been taken to reorganize on ler State banking laws. The effect of such a repeal upon the public would be very unfavorable. In the first place, it would necessitate the liquidarecord who never were placed in a situ- tion of a large share of the thousand millions loaned by the national banksa measure of contraction trebly more widespread and disastrous than any retirement of legal tenders has been or ever could be. Next, it would substitute for the sound, safe and unshaken banking system now in vogue, the un even and unreliable system of State banking in vogue before the war, some of the results of which were experienced last Winter. As far as the national banks and their stockholders are concerned, they can endure the repeal of the National Bank act without much i loss, but such a measure would be a terrible mistake for the country at

THE TELEMAHON.

What May be Accomplised by this New Electric Machine. A New York paper describes the new electric machine called the telemahon, now being experimented upon by Win. Wallace, and says by moans of it, power may be obtained from any place where river power or tidal power is abundant, or may be generated where fuel is as cheap as at the coal minus, and by means of an ordinary cable may tradsmitted hundred of miles. The cable may be tapped at any point and the power used there, so that some notion may be formed of the stupendous re sulis that may follow, should it prove completely successful. Professor Siemens, of the Royal Society of Great Britain, who lately visited this country, in a recent address in Glasgow said in England a means of transmitting power water course does not lend aid. amount of water falling over the falls lion tons an hour, falling one hundred and fifty feet. The amount of coal required annually to raise such a weight igious vocations, from the three-card up to the point from which it falls, monte man up to theology, taking in which is a measure of the amount of the power yielded by that water in fal!ing, would require the consumption of 260,000,000 tons of coal a year, which is the amount now consumed by the en tire world. Now if 50 per cent of the power used to drive the first electric machine may be received from the sec-ond, and hence, if the whole power of the Niagara could be utilized, it could be distributed over the United States so as to give from the waterfall alone a power equal to the present entire mechanical force of the world, estimating that half of the coal used is solely for mechanical powers.

Encouragement for the Feeble. So long as the falling of vitality are capable of being re-kindled into a warm and genial glow, just so long there is hope for the weak and emaciated invalid. Let him not, therefore, despond, but derive encourgement from this and from the further fact that there is a restorative most potent in renewing the dilapidated powers of a broken down system Yes, thanks to its unexampled tonic virtues, Hostetter's Stomach Bitters in daily reviving strength in the budies and hope in the minds of the feeble and ner vaus. New Orleans, Sept. 11.-During 62° 26° below the maximum temperature. Windows were instantly closed and the covering of patients increased, died. It has been chilly, with a keen all, causing an increase of the fever. From 12 m. to 6 p. m. 150 new cases were reported to the Board of Health, making an aggregate since Tuesday noon of 405. In the same time 24 til the last hope is abandoned. deaths were reported, the total since Tuesday noon being 114.

The health authorities say new cases attacked to day are in far greater danger than those previously attacked. Lighting fires in the street to create smoke has become general in the second discal to a November evening. The Peacorner of Magazine and Lafayette streets presents the appearance of a mammoth retail grocery, with forty clerks constantly delivering goods. On the ground floor is piled flour in barrels, hams, shoulders, chests of tea, tierces of rice, lard, salt, bucon sides and bags of pota-

The room is divided by an immense shelf, heaped with paper bags of each rations delivered on alternate days, clerks being employed until midnight making packages. Requisitions of all relief societies are honored promptly. Sixty needy clerks work for rations, and paid any one. To-day a line of 600 women with baskets, and a miscellancous erowd of 1,000, occupied the streets. The Association delivers 18,000 rations daily. In a single room on Ursuline street, to day, the sanitary inspector liscovered one corpse and six fever patients, ranging from fifty years to eighteen months.

NEW YORK, Sept. 11.-Clarence O. Valentine, of Memphis, died at Closter, N. J, a village 19 miles from this city, this morning, of yellow fover. He came from Memphis on Saturday, and was taken sick four hours after his arrival. An undertaker was got only by sending out of the village, and the dead man's father and brother were obliged to assist in putting him into the coffin, as nobody could be hired to go to the house for love or money. He was buried a few hours after his death in Red Hook | Cometery, three miles away from the His funeral was attended by only a few members of his own family, other members being left at home for

lack of means of conveyance. His father, a retired Baptist clergyman,read the service over his son's body. The villagers are in a state of great alarm, and Rev. Mr. Valentine has received anonymous letters warning him against allowing any member of his family to go out of the house, which is shunned by everybody. CINCINNATI, O., Sept. 11 .- The vari-

ous gypsy clans throughout the country are assembling in large numbers at Dayton, ()., to attend the funeral of the late Queen, Matilda Stanley, which takes place next Sunday at Woodland Cemecry. The Queen died at Vicksburg Miss., several months ago. Her body was removed to Dayton and the various clans were notified to attend the funeral at that place. It is expected the exercises will be very interesting.

CLINTON, ILL., Sept. 11.-Yestorday afternoon thieves entered the boot and shoe store of J. Kempshall, Maroa, and while Kempshall was in the back room the thieves stole a watch valued at \$50. The thieves were tracked to Clinton, where all trace of them was lost. A thief also entered a colored man's house in this city and stole two suits of clothes and some money. The thief was apprehended a few minutes later and placed in jail, and the goods recovered.

Caino, Itala, Sept. 11.-There is no fever in the city, and with the present cool weather there is a general feeling that ('siro will escape the visitation of the scourge.

BATON HOUSE, La., Sept. 11.—Some thirty deaths of yellow fever have occurred to date. Eighty-eight new cases were reported for the three days ending yesterday morning. At least forty more will be added this morning. The Howards, by their thorough sys

tematic organisation, have saved many lives that otherwise would have been lost through neglect. Attention is promply given to such case as soon as reported. Our physicians are untiring, and as yet have not asked to be reinforced. The Howards have now some fifty purses out. The measures adopted are keeping down all panie. It is evident. however, that the trying ordeal is new fairly before us, but our people will, I believe, meet it calmly. A cold rill, I believe, meet it calmly. London, Sept. 11.-A frightful colliery explosion occurred to-day at Aberearne, near Newport, Monmonthshire. There were 371 men in the pit, The Cold Wave. of whom eighty have been rescued. The pit is on fire.

> Ten more miners, badly burned, have been rescued, and the body of one boy recovered. The fate of the remainder may be judged from the fact that ex-plorers found fourteen horses dead, one only a few yards from the foot of the shaft. The air in the mine is very im-

The loss of life by the colliery disaster is unprecedented in South Wales. The number of dead is estimated at 280 Two of the saved died from their burns, and others are in a precarious condition. There is not the slightest hope of rescuing any more alive, as the workings are very intricate, and extend three miles. So far only about seven corpses have been recovered. The explosion occurred soon after

neon. Those on the bank know it by Tuesday night the mercury dropped to the rumbling noise and ascent of a dense volume of smoke. All the people in the district rushed to the pit's mouth in consternation. The scenes of distress but many who had reached the crisis are indescribable. According to the latest advices, the pit is still burning, north wind all day, to the surprise of and the managers are discussing the propriety of flooding it, and it seems certain that all the men are cither burned to death or suffocated. THE MAINE PLECTION.

For the first time in twenty years the state of Maine has failed to elect a Republican governor and state officers, although the candidates of the party have received a handsome plurality over those of the other two parties. This result, though not generally looked for, was not considered impossible by the best political judges, and should therefore not surprise anybody very much. The truth is, that the times are propitions for the success of any movement which affords opportunities for the display of the arts of the demagogue. The paralysed condition of many of the industries of the country, the lack of emplayment consequent thereto and the presence of want and suffering in wide regions-all these make easy the task of the demagogue who has a sovereign panacea for all the ills of the people -When a man is in debt beyond his abil ity to pay, or when he has no employment and nothing for his family to live upon, he is an easy victim for the ad vances of the blatherskite who comes to him with specious promises of "more money," because he argues that nothing could be worse than his present condition, and that any change would be for the better. Men in this condition are not very apt to be affected by any appeal to their sentiments of national honor, nor even by references to historical parallels going to show the utter sountry; the people are behind the futility of the fiat money idea. They are really prone to catch at any scheme, however wild, which holds out to them the alluring promise of better times.

We do not have any apprehensions that the flat money craze will ever carry the country. It will have its day, like many another wild scheme, but its death will be speedy and inglorious. It is not likely that it will survive long enough to be a factor in the elections of 1890, but while it struts its brief career it may carry a congressional distriot here and there, as it has in Maino, and then follow in the wake of grangerism and its other almost forgotten predecessors.

In 284 cities and towns Gov. Conner this year received 47,278 votes; the same towns last year gave him 44,998. The Democratic candidate in these towns last year received 32,673 votes. and this year 22,754. These figures show that the Republican vote has inpolitician, horse trainer, acronaut, ground creased 2.280, while the Democratic and lofty tumbler, music teacher, dane ing master, dc. Let us abolish it vote falls short of last year's vote 9,910. why, it savors of slang It is as com-In these towns Connor (Rep.) has a majority over Garcelon (Dem.) of 24,524, and 14,442 majority over Smith (Greenbacker). From these figures it will be seen that the greenback vote in Maine is very largely made up from the Demporatic party, and clearly indicates that if the Republican party had only the Democratic or Greenback party to defeat it would be an easy task, but where the state laws are such that the winning party must have a majority over all opposing factions, the Hopeblican party finds it more difficult to overcome all the heresies that seem to have taken possession of the people. The Democratic party, without any fixed policy of its own except opposition to every Republican measure, stands ready to coalesce with any form of opposition, even to the extent of supporting Ben. Hutler for governor of Mansachunetts.

Taylor's little band were surrounded. The volunteers were so numerous that very many regiments, with my own, were notified that they were not wanted. ('onsequently, I do not feel that I carned the title. I have never smelled powder, I never fought, bled and died for my country—there-fere I am unworthy of the title, and feel it sensibly when in the presence of Gov. Oglorby, Captain Fost, Corporal W. J. Usrey, Judge Gallagher, Dr. Stapp, and who saved the Union in our recent struggie-as I only raised companies, drilled them, and marched them to the nearest rendervous. Only doing this, I aspire to no distinction I should only be known as a citizen in war, a soldier in peace, although I have been in many hard-fought engagements while doing camp duty, and upon every occasion was at my post in the front rank, shoulder to shoulder with my brave comrades, and with courage unequaled in history gave the order, "Onward, my boys charge, my gallant lads! dare to follow where I fead!" when a wagon loaded with watermelons was driven inside of our picket lines. We knew no such word as fail. The entire line advanced with the tread of veterans, our swords were unsheathed, and with cool heads

and unruffled blood we split them in twain and drank from the pulp-cleaned rind the water, as did the Romans the blood from their memies' skulls. In my judgment there are too many watermelon generals, colonels, majors, &c., in our midst. Let the military titles signify who did patriotic service to their country, and not to men of my record who never were placed in a situation to spill the first or the last drop of blood in defence of the old flag. We also have in this democratic country too many titles in the civil department, where one man is as good as another although poor as a church mouse, provided he has implanted in his nature to "do unto others," &c , and the manhood to bear up under adversity when "disaster upon disaster comes following fast, following faster." This glorious repub lie knows no royalty. We want no lords; every man is a sovereign. Our imitations of the countries across the pond is a species of flunkeyism that ought not be tolerated. It is superfluous balderdash to talk of His Excellency the Governor. We have too many Esquires, too many men with the title of Honorable tacked to their names, it is the custom to prefix "honorable" to our public servants from county supervisors through all the official cutalogue. THE REPEAL OF THE RESUMPTION LAW. The Effect Upon the National Banks-What the Result Would He to

The efforts of the Greenback parties to secure the repeal of the Resumption act, and the effect upon the country, if the next Congress, is receiving serious consideration in many places. Upon this subject the Philadelphia North

American says: There is a general expectation that an effort will be made for the repeal of the National Bank act, and if the Greenbackers and Democrats carry the political canvass this Fall, its chances for success will be decidedly good. The provisions of the act at present are worth little or nothing to the banks, and many of them are detrimental, as other veterans of the Mexican war; they impose burdensome taxes and ethalso, when in company of our brave boys or restrictions that the State banks are free from. The repeal will not in any way injure the national corporations, except it will be likely to throw a large volume of bonds on the market that are now on deposit with the Government to accure circulation. Such an increased offering of the securities, and the pressure to sell, would naturally cause a heavy decline in their market value, and might, for the time being, greatly disarrange the finances and general business of the country. If, however, the proposed programme

of substituting legal tenders for national bank currency should be carried out, the scarcity of currency would only be temporary; but the loss to the national banks by the depreciation in the price of their securities would be severe, and some of them are said to be already preparing for such an emergency by has become general in the second dislisposing of their bands so far as they are able to do so, and it is hinted that cal to a November evening. The Pean some instances the necessary meas ures have already been taken to reorganize on ler State banking laws. The effect of such a repeal upon the public would be very unfavorable. In the first place, it would necessitate the liquidation of a large share of the thousand millions loaned by the national banksa measure of contraction trebly more widespread and disastrous than any retirement of legal tenders has been or ever could be. Next, it would substitute for the sound, safe and unshaken banking system now in vogue, the uneren and unreliable system of State banking in vogue before the war, some of the results of which were experienced | 25 members serve gratis. THE TELEMAHON.

What May be Accomplised by this New Efectric Machine.

A New York paper describes the new electric machine called the telemahon, now being experimented upon by Win, Wallace, and says by means of it, power may be obtained from any place where river power or tidal power is abundant, or may be generated where fuel is as cheap as at the coal minus, and by means of an ordinary cable may tradsmitted hundred of miles. The cable may be tapped at any point and the power used there, so that some notion may be formed of the stupendous resulis that may follow, should it prove completely successful. Professor Siemens, of the Royal Society of Great Britain, who lately visited this country. in a recent address in Glasgow said in England a means of transmitting power galaxy of stars that no generation has equaled, and, I think, never can be duplicated in the event we thin them exhausted if America and the coal is water course does not lend aid. amount of water falling over the falls lion tons an hour, falling one hundred quired annually to raise such a weight up to the point from which it falls, which is a measure of the amount of the power yielded by that water in falling, would require the consumption of 260.000.000 tons of coal a year, which is the amount now consumed by the en tire world. Now if 50 per cent of the power used to drive the first electric machine may be received from the second, and hence, if the whole power of the Niagara could be utilized, it could be distributed over the United States so as to give from the waterfall alone a power equal to the present entire mechanical force of the world, estimating that half of the coal used is solely for mechanical powers.

Encouragement for the Feeble. So long as the failing of vitality are capable of being re-kindled into a warm and genial glow, just so long there is hope for the weak and emaciated invalid. NEW YORK, Sept. 11 .- Clarence O l'alentine, of Memphis, died at l'hoster, N.J. a village 19 miles from this city. this morning, of yellow fever. He came from Memphis on Saturday, and was taken sick four hours after his lack of means of conveyance. His father, a retired Baptist clergyman, read the service over his son's body. The villagers are in a state of great alarm, and Rev. Mr. Valentine has received anonymous letters warning him against allowing any member of his family to go out of the house, which is shunned by

everybody. CINCINNATI, O., Sept. 11 .- The various gypsy clans throughout the country are assembling in large numbers at Dayton, ()., to attend the funeral of the late Queen, Matilda Stanley, which takes place next Sunday at Woodland Cemecry. The Queen died at Vicksburg Miss., several months ago. Her body was removed to Dayton and the various clans were notified to attend the funeral at that place. It is expected the exercises will be very interesting.

CLINTON, ILL., Sept. 11.-Yestorday afternoon thieves entered the boot and shoe store of J. Kempshall, Maroa, and while Kempshall was in the back room the thieves stole a watch valued at \$50. The thieves were tracked to Clinton, where all trace of them was lost. A thief also entered a colored man's house in this city and stole two suits of clothes and some money. The thief was apprehended a few minutes later and placed in jail, and the goods recovered.

CAIRO, It.L., Sept. 11.-There is no fever in the city, and with the present cool weather there is a general feeling that Cairo will escape the visitation o the scourge.

BATON HOUGE, La., Sept. 11.—Some thirty deaths of yellow fever have occurred to date. Eighty-eight new cases were reported for the three days ending yesterday morning. At least forty more will be added this morning. The llowards, by their thorough sys

tematic organisation, have saved many lives that otherwise would have been lost through neglect. Attention is promply given to each case as soon as reported. Our physicians are untiring, and as yet have not asked to be reinforced. The Howards have now some fifty purses out. The measures adopted are keeping down all panie. It is evident, however, that the trying ordeal is new fairly before us, but our people will, I believe, meet it calmly. A cold norther is blowing this morning.

All the people in the district rushed to the pit's mouth in consternation. The acenes of distress are indescribable. According to the latest advices, the pit is still burning, north wind all day, to the surprise of and the managers are discussing the propriety of flooding it, and it seems certain that all the men are either burned to death or suffocated. Flooding will probably be briefly delayed until the last hope is abandoned.

> Madison, Wis., Sept. 11 .- A reception was tendered to President Hayes in the Assembly Chamber last night, over 6,000 persons shaking hands with him. This morning the visitors took a steamboat ride around Fourth Lake .-On the return, the President and party went to the fair grounds, but Mrs Hayes, with the Mayor and Mrs. Smith and ex Governor Gregory, repaired to the Ladies' Hall of the State University, where a few hours were spent in so cial intercourse with the delighted young lady students. A CHARITY CONCERT IN FACT -The concert to be given this evening for the benefit of the yellow tever sufferors, is a said to appear before the peaches are charitable affair in the strictest sense of the word The use of the Opera House is kind of dry rot, which in a few days donated, as is also all the printing and other means used to give publicity to the affair; the singers and musicians give their services, and Mr J. Goldstein donates the use of a fine piane, and everything connected with the preparation for and the the giving of the concert, is a gratuity, so that it will be seen that every cont paid for admission to the entertainment will be available for the relief of the sufferers. The programme prepared for the occasion is a highly entertaining one, consisting in the vocal department of quartettes, ducts, solos and choruses, by the best talent of Decatur; and the instrumental music will be furnished by the Decatur band. The talent culisted to carry out the programme is a sufficient guarantee that the entertainment will be first-class.

OUR COUNTY FAIR -Too much praise cannot be awarded to the present officers of the Macon County Agricultural Board for the pains they are taking to have everything in readiness for a first-class fair. Mr. M. B. Thomas, the secretary, has thoroughly systematized his part of the work, which will be a great advantage to exhibitors. Persons desiring any information upon any point connected with year is the best that could be selected for a fair is this part of the country, and the grounds will be put in good order. Now York Times. Henry M. Stanley, who is (or was lately) still in Paris, has not recovered from the effect of his African fovers. He seems unable, with the best cars of himself, to get rid of them. He is yet thin and weak, and recovers so slowly that he is despondent at times of ultimate convalescence. A private letter from Laverpool purports to throw more light upon his antecedents. It says he was born in this city Oct. 26, 1843, his father being an English sea-captain, and his mother Irish, and that he was bap-tized Henry M. Stanley by Father Smith at the James Street Roman-Catholic Church. While a child, his parents returned to Europe, and took him with them. His father died when the boy was 15, and, having had a dis-agreement with his mother, he came back to America—having sailed from Queenstown in the bark Jacob Kellerd and she never saw him again until the day of Livingstone's funeral at Westminster Abbey. She afterward called on him at the Langham, where he was staying; but, as the story goes, he told her she was mistaken in thinking him her son. There have been many stories of Stanley's place of birth and the conditions of his youth; but, as this one assumes to come directly from the woman claiming to be his mother, it may have some foundation.
